

Locum.

Locum manages, develops, and constructs two million square meters of healthcare properties on behalf of its owner, Region Stockholm. Through innovation and collaboration, Locum leads the development of Sweden's best healthcare environments.

A hospital is a complex facility. It houses numerous technical systems that must operate seamlessly and continuously, 24/7, throughout the year, to ensure that vital healthcare services can be delivered.

Consilium supplies and services fire alarm systems at several of Locum's hospitals. These systems are complex, and there are high demands for operational reliability. The hospitals where Consilium delivers and services systems include: **Danderyd Hospital, Södertälje Hospital, Huddinge Hospital, Karolinska Hospital, Handen Hospital, Löwenströmska Hospital, St Göran Hospital, Sabbatsbergs Hospital, JakobergsHospital and Söder Hospital.**
