

## Malmö Stad

The City of Malmö is Sweden's third largest municipality and one of the largest employers in Malmö, with approximately 26,000 employees. The organization of the City of Malmö is comprised of 14 departments, each with different areas of responsibility. The municipality is responsible for a significant portion of public services for Malmö's residents.

**We have established a mutually beneficial collaboration characterized by open dialogue. For several years, Consilium Safety Sweden has had a framework agreement with the City of Malmö for the installation and maintenance of fire and evacuation alarm systems with spoken announcements.**

The City of Malmö's Service Department utilizes Consilium's digital service, LiveOperation, for remote management of the city's connected fire and evacuation alarm systems. Through Consilium's digital solution, Malmö City can streamline its environmental and climate impact by reducing the need for unnecessary transportation and enabling remote management of multiple functions.

Consilium Safety Sweden South has a long-standing partnership with Malmö City and has delivered hundreds of fire and evacuation alarm systems that currently protect preschools, schools, elderly care facilities, offices, and sports venues.
