

G017071

Fire Alarm Cabinet

External Door

Part no. 5100861-00A

System: TERRA FIRE

General Description

The External Door is a fully transparent door with a plexiglass window.

The External Door is intended to be used with either the Fire Alarm Control Panel or the Distributed Cabinet, when they are used as combined Fire brigade / Evacuation - control panel. The External Door replaces then the ordinary door, so that switches, evacuation panel, and other controls are visible through the plexiglass window.

The External Door is supplied with a keylock for Swedish standard key SS3654 to access the interior.

As standard the External Door comes as a right hinged door (opens from the left), however it is possible to change the hinge direction and turn the key lock around to open it from the right.

Accessories

Swedish standard keys SS3654

Data
