1(3) DATA SHEET

Sprinkler Release IP67

Salwico MCP-SPR-A (GB)

Part no. 5200037-01A

G003007

System: CS3000, CS3004, CS4000, Salwico Cargo, Salwico Cruise, Salwico Ro/Pax, Salwico Workboat, Salwico Yacht

General Description

The MCP-SPR-A is a push button for outdoor environment and designed for the Salwico addresssable fire alarm systems.

The selected material PC/ABS and the encapsulation, with ingress protection IP67, makes it very suitable for harsh environment.

Pressing the glass causing it to crack activates the sprinkler release. A protective plastic coating on the glass prevents operator injury.

An LED on the front of the push button indicates the fire alarm. The LED remains lit until the fire alarm has been reset on the fire alarm panel.

The push button can be tested with a special key included in the delivery.

The address of the push button is set with a DIP-switch.

The MCP-SPR-A provides short-circuit protection via connections 1–4 and no short-circuit protection via connections 5–8.

Spare glasses (10pcs.)

Part no. 5200077-00A

Connection

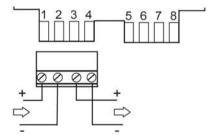

Connection of this call point depends on its function in the fire alarm system. The different alternatives are illustrated below.

Connection with short-circuit protection

NOTE

Connection with short-circuit protection is not applicable for system CS3000 or CS3004.

Test

Cover removal

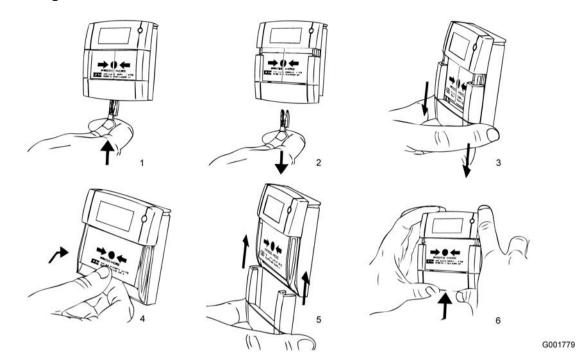

G003072

- 1. Remove the four cover fixing screws.
- 2. Place the edge of a large flat bladed screwdriver into the slot between the cover and back box, as shown in picture, and gently twist until the latches are disengaged.
- 3. Pull cover away from the back box.
